

LASER 994

HIGH SECURITY CODE CUTTING MACHINE

Features:

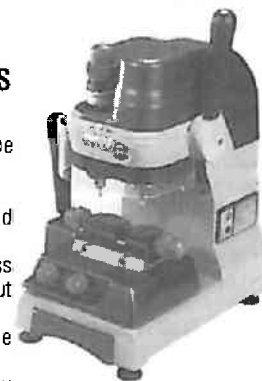

- Cuts by code, decode or depths
- Complete database of high security systems to be cut built in - no computer needed
- Easily updated with SmartMedia technology
- Key information is automatically converted to original lock specification when duplicating
- Includes A & C jaws to cut most popular high security laser keys; B & D jaws available as optional equipment
- Electronic calibration
- Universal 2.5mm cutter used for all applications
- Vacuum attachment included

BILASER994
17,990⁰⁰

LASER AND DIMPLE CUTTER

INCLUDES VW/AUDI ADAPTORS

- Duplicates high security laser and dimple type keys
- Micro-switch activated cutter start
- 51 lb cast iron machine reduces vibration and improves cut consistency and cutter life
- Dual mode system provides greater safety. Press the red button to calibrate and the black button to cut
- Long-lasting and bright LED style lamp
- Vertical and lateral carriage locking eases the cutting process
- Large, transparent cutter shield minimizes key shaving dispersal which improves safety and eases cleaning process
- Tools are easy to change and can be stored in tool compartment at base of machine
- One piece casting improves tolerance and cut accuracy
- Interchangeable face plates

BI303
4,478⁰⁰

Specifications:

Length 15"
 Depth 12"
 Height 21"
 Cutter 2.5mm diameter high speed steel

SEMI-AUTOMATIC KEY MACHINE

BI106
3,350⁰⁰

- Microswitch activation with improved spring loaded carriage design, handles and smooth, balanced operation
- Unique one-piece jaw alignment system features a locking mechanism preventing accidental carriage release
- Press down levers allow for easy jaw selection
- Heavy-duty cast iron body dramatically reduces vibration and noise improving both cut consistency and cutter life
- Micrometric tracer adjustment for quick, easy and accurate depth calibration
- Large transparent cutter shield and offset carriage improve viewing during cutting
- Four-way reversible jaws securely clamp residential, commercial, padlock and automotive keys including single and double sided versions
- Overhead light with drop-down magnifying glass illuminates key cutting area

BI106-C
w/Carbide Cutter
4,490⁰⁰

MANUAL MACHINE

BI101
1,598⁰⁰

- Unique design ensures parallel jaw alignment
- Four-way reversible jaws securely clamp residential, commercial, padlock and automotive keys including double sided versions
- Offset carriage for improved feel and viewing during operation
- "L" style jaw handles make key gripping easy and hard alloy handles reduce both inner and outer part wear
- Jaws rest directly on jaw pin for improved tolerance
- Lateral carriage lever eases the cutting process
- Wide spacing between jaws accommodates new longer and larger headed keys
- Small footprint
- Unique design ensures parallel jaw alignment
- Available in 12V/220V for mobile use

REPLI-CODE 7 TX

- Identifies and clones fixed transponders for Texas Instruments, Philips, Temic, Megamos and Sokymat in seconds
- Identifies and clones encrypted transponders for Texas Instruments through an innovative communication system; connect to the new Keyline super computer via text message or Internet to promptly receive the code to program a key
- Displays chip type, value and manufacturer
- Low profile and lightweight design
- Software can be easily updated and the unit is simple and easy to operate
- USB, serial port and 12v terminals
- Multiple language capability
- Digital display

TRANSPONDER DETECTOR

- Digital display
- Detects and identifies presence of transponders including Texas Instruments, Philips, Temic, Megamos and Sokymat
- Identifies both fixed and encrypted codes
- Innovative, compact and light design
- Quick and easy operation

095 AUTOMATIC DUPLICATOR

- Automatic operation
- Microswitch activation with release of spring loaded locking carriage
- Heavy-duty cast iron body dramatically reduces vibration and noise improving both cut consistency and cutter life
- Equipped with a carriage stop which prevents jaws from accidentally contacting the cutter
- Micrometric tracer adjustment features a dual axis gauging system for quick, easy and accurate depth calibration
- Smooth and accurate carriage movements are guaranteed by machine slide-ways in the casting
- Four-way reversible jaws securely clamp residential, commercial, padlock and automotive keys including single and double sided versions
- Features a soft-touch deburring brush
