CL415-SS	Tubular Deadlocking Latchbolt	Stainless Steel	180.00

CL1000 CABINET LOCK

The NEW CL 1000 Electronic Cabinet Lock has been designed as cost effective, simple, easy and quick retrofit for cam locks supplied as standard on a wide range of lockers, cabinets, and cupboards. It can just as easily be fitted to lockers or cabinets, which don't have a locking device already fitted, giving the owner immediate, simple, keypad access without the need for keys.

EASY TO FIT

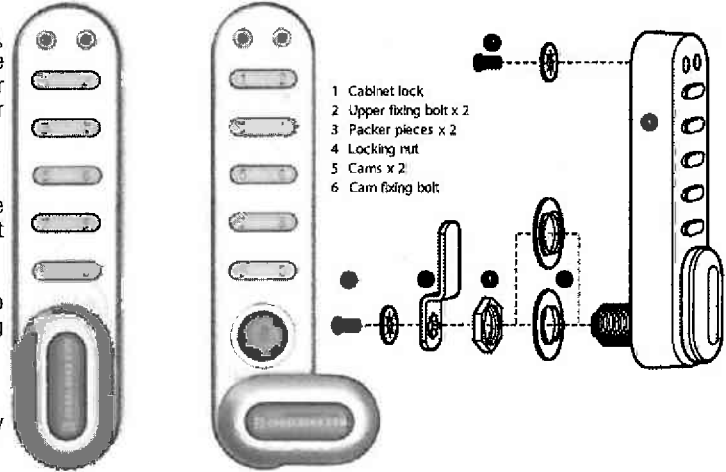

Fitting could not be easier, simply remove the existing cam lock, drill a 6mm hole for the upper fixing bolt, position the lock on the door and secure with the fixing nut (4) and upper bolt (2). Select and fit the appropriate cam (S), job done!

The Cabinet Lock can also be fitted to cupboards or other similar enclosures that do not have a cam fitted by simply drilling a 16mm hole for the spindle, giving immediate access control.

WHAT IS INCLUDED

The Cabinet Lock is supplied as standard with two cams, but will accept the majority of other cam variations that will fit onto the CL 1000's 8mm square spindle.

The Cabinet Lock is supplied with all the necessary fixings, template and operating instructions to fit the lock to the cupboard or cabinet.

- 1 Cabinet lock
- 2 Upper fixing bolt x 2
- 3 Packer pieces x 2
- 4 Locking nut
- 5 Cams x 2
- 6 Cam fixing bolt

L: 136mm (5.35")
 W: 32mm (1.26")
 D: 30mm (1.18")

P/N	Door Thick.	Finish	List
