EXIT CONTROL ALARM WITH LOCKING DEADBOLT

Cylinders Not Included

A versatile combination deadbolt exit alarm, specially designed to prevent unauthorized use of emergency exits: It remains securely locked from the outside and inside, yet is always ready to be opened during emergencies. When mounted on a single door, withdrawal of the bolt directly unlocks the door without sounding the alarm. Locking always arms the alarm system. The warning sign on the paddle bar (in braille too) alone is enough to deter most unauthorized use.

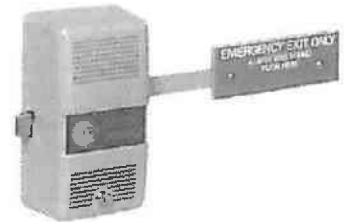

Packed 4/Case. Complete with wire, screws, clamps, 9v battery and mounting instructions.

- Single key controlled, positive mechanical bolt action, direct lever system. No cocking.
- Alarm can be silenced by use of authorized control key.
- Lock-on cover prevents tampering with operating mechanism or access to mounting screws or the alarm system.
- Five-year Limited Warranty

NOW WITH 9 VOLT BATTERIES - EASY REPLACEMENT!
