

NEW! PUSHBAR EXIT DEVICES FOR NARROW STILE GLASS DOORS - Grade 1

The design of the 1690 is ideally suited for demanding, high traffic applications. The vertical rods and latch mechanisms are concealed in the vertical door stile, ensuring trouble-free operation. The cover plates and end caps are constructed of cast metal to hold up to rigorous use.

A quick, single-point dogging feature in the housing deactivates the device and permits unrestricted traffic flow. This locking mechanism is designed to offer more versatility than crossbars, which require two-point dogging.

The 1690 utilizes the same rods and latches as the 1990 crossbar device, so existing 1990's can be replaced directly with the 1690 device - without removing the door.

Anodized aluminum finishes.

P/N	Length	Finish	Price
DD1690EO-36-DC13	36"	Dark Bronze	407.00
DD1690EO-36-US28	36"	Aluminum	383.00
DD1690EO-48-DC13	48"	Dark Bronze	431.00
DD1690EO-48-US28	48"	Aluminum	407.00

Be sure to specify handing - LHR or RHR

The 1790 rim device is typically used in applications where maintenance is a concern. The rim device has fewer parts and pieces than current exit devices, and that translates into less maintenance and adjustment. The 1690/1790 pushbar width is 2 1/2". The devices project 3" in the neutral position, and 2 1/4" in the depressed/dogged position.

P/N	Length	Finish	Price
DD1790EO-36-DC13	36"	Dark Bronze	372.00
DD1790EO-36-US28	36"	Aluminum	348.00
DD1790EO-48-DC13	48"	Dark Bronze	396.00
DD1790EO-48-US28	48"	Aluminum	372.00

1690 - Vertical Rod Device

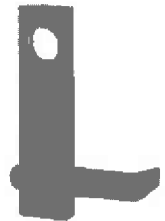

1790 - Rim Device

- Centercase provides a clear indication of direction of egress and completely covers the existing 1990 prep.
- Metal end caps protect the device from damage caused by passing carts and equipment.
- Vertical rods and latches are identical to the 1990 device and can work with existing panic frames.
- Electric latch retraction and request to exit/touchbar monitor switch options available.
- Electric dogging.
