• FILES

SWISS PRECISION FILES - PILLAR, REGULAR

General-purpose file used primarily for working on flat surfaces. Great for filing in slots, splines and similar applications. Parallel in width, yet tapered in thickness to make perfect flat filing possible.

Code	Length	Cut	Price
GR31.238	4"	0	24.50

PIPPIN

Provides chisel cuts for use in rapid removal of material, and etched cuts for fine finishing. Combines cross sections of the round with the crossing file, and possesses the edge of a knife file for finishing the junction of two curved surfaces and for opening slots when a 'V' shape is required. Tapered in width and thickness.

Code	Length	Cut	Price
GR31.267	6"	0	77.00
GR31.268	6"	2	83.50
GR31.269	6"	4	97.00
GR31.272	8"	2	115.00

ROUND

Used where it is necessary to enlarge a hole or round off a radius. Files with chisel cuts are used for rapid removal of material, and etched cuts are for fine finishing. Gradually tapered.

Code	Length	Cut	Price
GR31.288	6"	0	19.80
GR31.290	6"	2	24.25
GR31.291	6"	3	25.75
GR31.292	6"	4	28.25
GR31.293	6"	6	46.25
GR31.297	8"	2	33.50
GR31.298	8"	4	39.00

WARDING

Used for precision removal of burrs after milling operations on (office machines) and other similar parts. Made for close tolerances. Parallel in thickness and tapered in width.
