

# Control Who Can Copy Your Key.

The versatile Medeco cam lock can give you protection against theft in dozens of applications. But it doesn't matter how secure a lock is if anyone who has access to your key – from employees to cleaning people – can copy it.

So Medeco created the patented Biaxial® system. Now it's almost impossible for someone to get a copy of your keys without your permission. In the first place, the key's unique Biaxial design prevents anyone but a Medeco dealer from ordering blanks. Only Medeco security professionals are authorized to copy your key, and only with your written consent. You can even get a card that requires your authorization before a key is made.

# Toughness That Leaves Thieves Shaking Their Heads.

The All-N-One™ cam lock provides the high security features you're looking for in a secure lock. It features Medeco's unique double-locking action, which makes it virtually pickproof.

Should a thief decide to attempt to drill through the lock, he'll be frustrated in that attempt, too. Each cam lock is reinforced with hardened-steel inserts designed to resist drilling.

# For All The Times You Need A Cam Lock. A High Security Lock.

Businesses have found Medeco's cam locks provide exceptional protection in a wide range of applications. From sensitive alarm control panels to important computer files, from valuable boxes to vulnerable pharmaceutical storage.

Home owners need a cam lock good for gun cabinets and other areas where valuable items are kept.

The All-N-One cam lock is strong, secure, and easy to install. And it's only available from authorized Medeco security professionals.
